Buy

Asset quality steady; PPoP->PAT conversion set to improve

Retail trends in line with top players; Valuations compelling

- SBIN's focus has been on building a granular and high-quality portfolio. With retail growth back to pre-COVID levels and improving trends in Home loans, Auto loans, Gold loans, etc. we expect gradual deployment of excess liquidity toward incremental retail demand. Also, improvement in cost of funds is likely to drive margins, and thus, enable strong NII growth.
- We estimate SBIN's PPoP at 11% CAGR over FY20-23E (v/s 7% CAGR over FY15-20). Therefore, overall PPoP to provisions should strengthen to 2.4x by FY23E (v/s avg. 1.1x over FY17-20). Our PAT estimate stands at INR302b/INR393b for FY22/23E.
- The current valuations are compelling with the core bank trading at 0.4x FY22E ABV (1.3x FY22E P/Core PPOP and 3.1x FY22E P/E). RoEs should recover to ~14% by FY23E. We expect rerating in the stock as long awaited earnings normalization cycle has begun. Reiterate Buy with TP of INR300.

Earnings normalization begins; PPoP conversion to PAT set to improve

- SBIN appears well positioned to report strong uptick in earnings. The NPL formation has moderated significantly while strong pipeline of accounts under recovery should enable further improvement in asset quality. SBIN has improved its PCR sharply (similar to large private peers). It has a PCR of ~88% on the corporate book, which should enable normalization in credit cost from FY22. This, along with an expected uptick in core operating performance will further propel earnings growth, in our opinion.
- We, thus, estimate SBIN's PPoP at 11% CAGR over FY20-23E (v/s 7% CAGR over FY15-20), aided by improvement in cost of funds and market share gains. Overall PPoP to provision coverage should strengthen to 2.4x by FY23E (v/s average of 1.1x over FY17-20). We expect PAT of INR302b/INR393b for FY22/23E.

Franchise continues to gain systemic market share

SBIN continues to witness market share gains, both in loans and deposits. Unlike other PSBs that have lost market share, SBIN's loan share has improved to 22.4% (v/s 19% in FY15). Also, deposit market share has increased to ~24% (v/s 21.6% in FY15). We also note that market cap to deposits/loans (adjusted for subs) has declined sharply to ~2.7%/4.1%, the lowest levels (including the GFC period). The core bank trades at 1.3x FY22E P/Core PPOP and 3.1x FY22E P/E, providing an attractive risk reward opportunity. The pickup in earnings should enable a rerating in the stock.

Retail credit back to pre-COVID levels – forms 62% of total growth over 1HFY19-21

- SBIN is focused on building a granular and high-quality portfolio, with Retail being a key growth driver. Over the past two years, retail loans delivered ~17% CAGR and contributed 62% of the total credit growth. Thus, the share of retail loans improved to ~38% (v/s ~32% in 2QFY19). Among segments, SBIN's market share in Home loans improved to ~22% (v/s ~16% in FY15), Auto loans improved to ~12% (v/s 9% in FY15). Its credit card base increased to ~18.7%.
- The increase in Xpress credit was also driven through the YONO platform. Further, loans of INR250b and liability of INR600b has been acquired through YONO. ~21k+ savings accounts open daily through the YONO platform.
- As economic activity is picking up pace, sanctions and disbursements in retail are trending back to pre-COVID levels. Home loans witnessed 12% YoY growth in disbursements, Auto loans 27% YoY and personal loans 61% YoY. Gold loans picked up well and grew 4x YoY. With a much superior franchise, SBI is well placed to gain incremental market share in the current environment.

Funding cost yet to bottom out; NII growth robust at ~15% YoY

SBIN offers SA rate of 2.7% (lowest among peers) and has reduced its peak term deposit rate by 180bp to 4.9%. SBIN's cost of deposits moderated to ~4.4% (improved by 13bp QoQ) v/s other large private banks' cost of funds of 3.8-4.6% (improved 25-35bp QoQ). We, thus, expect cost of funds/deposits to further bottom out in the coming quarters. During the 2QFY21, NII grew ~15% YoY, broadly in line with large private banks (HDFCB, ICICIBC), despite CD ratio being at decade low of ~66%. With business momentum picking up, we expect gradual deployment of excess liquidity. Further improvement in cost of funds is likely to support margins.

CE at ~97% is best-in-class; PCR improves to 71% v/s 54% in 1HFY19

- Collection efficiency (CE) was >97% in Oct'20 (97% in Sep'20) and is in line with other large private lenders. The strong collection trend was mainly led by higher share of customers from PSU/Government employees, which stood at ~37% of Corporate loans, 94% of Personal loans and 50% of Home loans customers, thereby aiding low risk profile. The issues in corporate NPA cycle is now largely behind and the bank has improved its PCR sharply (similar to large private peers). It carries healthy PCR of ~88% on the corporate NPA book.
- The bank has indicated total asset quality impact of INR600b (2.6% of loans), including restructuring of <1% while it awaits healthy write-backs from the resolution of stressed assets. We expect credit cost normalization FY22E onwards at 1.6%/1.4% for FY22E/23E (v/s management's investor day guidance of credit cost normalization to <100bp in the base case; <110bp in stress case).

Subs remain strong industry-leading compounding machines

SBIN's subsidiaries – SBI MF, SBI Life Insurance, SBI General Insurance and SBI Cards – have displayed robust performances and gained scale and market share in their respective segments.

SBI Cards has a market share of 18.7% on a card base of 11m and 20.5% share in card spends. It witnessed 42% CAGR in card spends over FY17–20, while PAT

MOTILAL OSWAL

- CAGR over the similar period stood at 47%. Return ratios remain healthy with RoE at 27.4% as of FY20.
- **SBI Life Insurance:** A 25% CAGR was witnessed in un-weighted NBP over FY15—20 (v/s 18% for private players), with VNB margin of 18.8% as of 1HFY21. It has one of the lowest cost structures, with total expense ratio of 8.8%, enabling it to deliver operating RoEV of 20.5% in FY20.
- SBI Asset Management is the largest AMC in India with total AUM of ~INR4.2t and market share of ~15.3%. AUM increased at robust CAGR of 38% over FY15—20 to INR3.7t in FY20 (+31% YoY over 1HFY21). PAT witnessed 30% CAGR over the same period to INR6.0b in FY20 (36% YoY to INR3.85b with RoE of 34.4% over 1HFY21).
- **SBI General Insurance:** In FY20, gross written premiums grew 45%; thus, market share improved to 3.59% in FY20 from 2.77% in FY19. Overall, PAT grew 23% YoY to INR4.1b in FY20 (53% YoY to INR3b with RoE of 27% over 1HFY21).

Valuation and view

■ SBIN's performance has been healthy in a challenging environment. Asset quality outlook is better with improvement in CE to 97% (in line with large private peers). The bank expects total asset quality impact of INR600b (2.6% of net advances) including restructuring of <1%. SBIN has also prudently improved PCR over the last few years; corporate PCR now stands at 88%. Thus, we believe the earnings normalization cycle for SBIN has begun as the uncertainty brought about by the COVID pandemic has receded significantly. Also, SBIN has strong franchise, both in assets and liabilities, and is gaining market share unlike other PSBs, which have lost market share to private players. Current valuations too are extremely compelling with the core bank trading at 0.4x FY22E ABV (1.3x FY22E P/Core PPoP and 3.1x FY22E P/E). RoEs should also recover to 14.2% by FY23E. Thus, we believe a rerating in the stock is imminent. Reiterate Buy with TP of INR300 (0.7x Sep'22E ABV).

Earnings normalization begins; PPoP conversion to PAT set to improve Valuations compelling

SBIN appears well positioned to report strong uptick in earnings. The NPL formation has moderated significantly while strong pipeline of accounts under recovery should enable further improvement in asset quality. SBIN has improved its PCR sharply (similar to large private peers) and has PCR of ~88% on the corporate book, which should enable normalization in credit cost from FY22E. This, along with an expected uptick in core operating performance should further propel earnings growth, in our opinion.

RoE to revert back to double digits over FY22-23E; RoA likely at 0.8% by FY23E.

- We, thus, estimate SBIN's PPoP at 11% CAGR over FY20-23E (v/s 7% CAGR over FY15-20), aided by improvement in cost of funds and market share gains. Thus, overall PPoP to provision coverage should strengthen to 2.4x by FY23 (v/s average of 1.1x over FY17-20). We expect PAT of INR302b/INR393b for FY22/23E.
- Market cap to deposits / loans (adjusted for subs) have declined sharply to ~2.7%/4.1% – the lowest levels (including GFC). The core bank trades at 1.3x FY22E P/Core PPoP and 3.1x FY22E P/E, providing an attractive risk reward opportunity while the pickup in earnings should enable the bank to re-rate.

Robust funding profile; CASA ratio healthy at ~45%

SBIN continues to see strong growth in deposits and has succeeded in maintaining a robust liability franchise, with market share in deposits improving by 46bp to 22.8% as at FY20. Domestic deposit growth came in strong at 15% YoY and overseas deposits grew at 12% YoY over 1HFY20. Growth in domestic deposits was led by CASA deposits at 15.1%; term deposits growth came in at 13.9% YoY. Overall, the bank's CASA ratio stood at 45.4%. Retail domestic CASA grew 10.8% YoY to INR10.2t; thus, the total retail domestic CASA ratio stood at 48.3% as at FY20. Currently, SBIN opens ~70,000 savings accounts per day.

CASA ratio witnessing an improvement over 2QFY21.

We believe the impetus for strong incremental growth in term deposits is low. This is attributable to the narrowing of the differential between SA and TD accounts, driven by 135–200bp decline in TD rates in the past year. This is likely to aid growth in CASA deposits, enabling further improvement in CASA ratios.

Exhibit 17: CASA ratio trends across banks for the past few quarters

SBIN has lowered its SA rate to 2.7% (the lowest among peers).

Funding cost yet to bottom out; Margins to remain steady

SBIN offers a SA rate of 2.7% (lowest among peers) and has reduced its peak term deposit rate by 180bp to 4.9%. SBIN's cost of deposits moderated to ~4.4% (improved by 13bp QoQ) v/s other large private banks cost of funds of 3.8-4.6% (improved 25-35bp QoQ). We, thus, expect cost of funds/deposits to further bottom out in the coming quarters. Overall, we expect gradual deployment of excess liquidity as CD ratio is at decadal low of ~66% currently. Also, further improvement in cost of funds is likely to support margins.

CE at ~97% best-in-class; PCR improves to 71% v/s 54% in 1HFY19

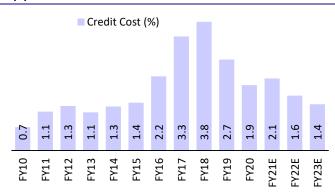

- CE was >97% in Oct'20 (97% in Sep'20) and is in line with other large private lenders. The strong collection trend was mainly led by higher share of customers from PSU/Government employees, which stands at ~37% of corporate loans, 94% of personal loans and 50% of home loans customers, thereby aiding low risk profile. The issues in the corporate NPA cycle is now largely behind and the bank has improved its PCR sharply (similar to large private peers). It carries healthy PCR of ~88% on the corporate NPA book.
- The bank indicated total asset quality impact of INR600b (2.6% of loans), including restructuring of <1% while it awaits healthy write-backs from the resolution of stressed assets. We expect credit cost normalization from FY22E at 1.6%/1.4% for FY22E/23E (v/s management's investor day guidance of credit cost normalization to <100bp in the base case and <110bp in the stress case).

Subs' contribution to consolidated profit increasing steadily

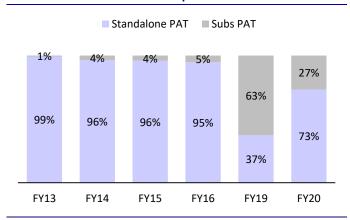

Underscoring the importance of an SOTP-based valuation

Over the past few years, growing customer awareness for various financial products such as mutual funds, insurance products and credit cards is reflected in the robust earnings performance of SBIN's subsidiary businesses. At the same time, these subsidiaries have gained scale and market share in their respective business segments, resulting in strong expansion in their market multiples. Hence, over time, SBIN has increasingly transformed into an SOTP-based play v/s standalone play. The contribution of subsidiaries to the SOTP of banks has increased significantly, with SBIN's subsidiaries contributing ~43% to our SOTP (~56% as a percentage of CMP). Similarly, the contribution of subsidiaries to overall consolidated profits has been increasing in the last few years; in FY20, the subs of SBIN contributed ~27% of its consolidated profits. As these businesses gain further scale and market share, the contribution of subs to the SOTP of banks is expected to improve.

Exhibit 33: SBIN - Subs' contribution to CMP

Exhibit 34: SBIN – Trend in composition of consolidated PAT

Source: MOFSL, Company

Source: MOFSL, Company

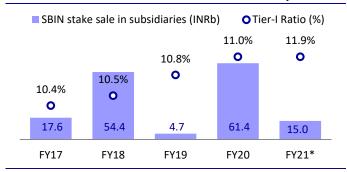

Furthermore, over the past few years, the bank has been facing asset quality challenges that have impacted its earnings, capital position and ability to pursue growth. This has resulted in subdued valuations and ability to access the capital markets. Therefore, the bank is focused on monetizing stakes in non-core assets to improve its capital position. SBIN has sold stakes in various subsidiaries, such as the Insurance and Cards businesses, raising ~INR154b over FY17–1HFY21.

SBI Cards delivered PAT CAGR of 47% over FY17–20.

SBI Cards – Operating metrics remain healthy; Near-term growth under pressure

SBI Cards has delivered strong performance in both customer acquisition and earnings till FY20. As of 1HFY21, SBI Cards had market share of 18.7% on a card base of 11m and 20.5% in card spends. It delivered 42% CAGR on card spend over FY17–20, while PAT CAGR over the similar period stood at 47%. Return ratios remained healthy with RoE at 27.4%. Write-offs were also controlled and in line with the industry average. SBI Cards seeks to expand its sourcing by leveraging SBIN's higher penetration, integrating with SBIN's platforms and cross-selling opportunities with subsidiaries. The COVID-19 outbreak has impacted business growth, resulting in sharp moderation in spends. While spends are increasing as the economy recovers, asset quality outlook remains uncertain as SBI Cards witnessed sharp deterioration in asset quality ratios and the restructuring book remains high at ~9%. Thus, the near-term outlook remains under pressure.

SBI Life – Strong parentage, unmatched distribution; VNB margins improving

New business premiums stood at CAGR of 25% over FY15–20. SBI Life delivered ~21%/23% CAGR in new business/individual WRP over FY16–20, led by strong distribution network and healthy execution. We believe distribution strength would continue to aid market share gains. Also, renewal premium growth remains strong (29% CAGR over FY16–20), supported by improved persistency. Also, SBI Life has increased its focus on the Non-PAR Savings/Protection mix, which forms ~24% of APE (v/s ~6% in FY18). Overall, we expect the share of Protection/Annuity to increase in the near term. SBI Life reported consistent improvement in new business margins to 18.8% in 1HFY21, backed by cost control, improving Protection/Non-PAR mix, and rising persistency levels.

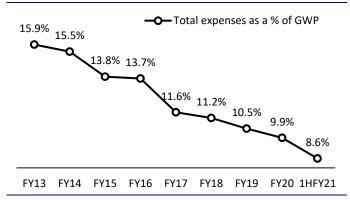

SBI Life has one of the lowest cost structures among peers. Interestingly, the company steadily reduced its total expenses as a percentage of the gross written premium (GWP) to 8.6% in 1HFY21 from 15.9% in FY13, led by higher mix of ULIPs and strong banca channel. However, the increasing mix toward the Non-PAR Savings /Protection business would limit major improvements on the cost front, in our view.

SBI General Insurance – Rapidly gaining scale and profitability

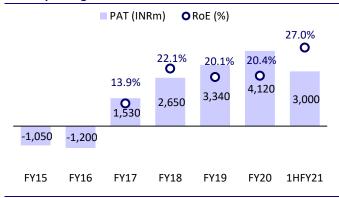

Gross written premiums stood at CAGR of 34% over FY15–20. The company has delivered robust performance, improving its market position and operational performance. In FY20, gross written premiums grew 45% (higher than industry growth). SBI General Insurance ranks 8th among private insurers and 13th in the industry on the basis of gross written premiums. Its market share improved to 3.59% in FY20 from 2.77% in FY19. The company delivered ~34% CAGR in gross written premiums over FY15–20. PAT grew 23% YoY to INR4.1b in FY20 from INR3.3b in FY19, with RoE of 20.4%. PAT further grew 53% YoY to INR3b with RoE of 27% over 1HFY21. Continuous improvement in process efficiencies, claims, and expenses led to improved operating ratios. A better growth rate in premiums, a well-diversified premium base, and the ability to leverage SBI's mammoth branch network should help the company achieve superior operating metrics. According to a news article (Link), SBI General Insurance business is valued at ~INR120b.

SBI Asset Management – Rapidly gaining market share

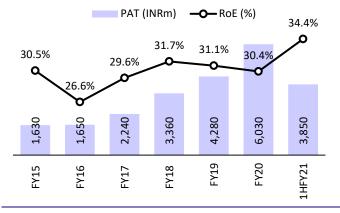

It is the largest mutual fund, with total AUM of ~INR4.2t.

SBI Mutual Fund is the country's largest ETF provider and mutual fund, with total AUM of ~INR4.2t and market share of 15.27% as at 1HFY21. AUM has been robust at 38% CAGR over FY15–20 to INR3.7t in FY20 from INR749b in FY15 (+31% YoY over 1HFY21). PAT over the same period witnessed 30% CAGR to INR6.0b in FY20, with RoE at 30.4%. PAT further grew 36% YoY over 1HFY21 to INR3.85b with RoE at 34.4%. SBI MF has a wide reach with ~6m retail investors and 5,000+ institutional investors. With broadly stable inflows from SIP accounts and an increase witnessed in the financialization of savings, we expect SBI MF to continue gaining momentum and maintain market share (~680bp over FY15–20).

MOTILAL OSWAL

Valuation view

- SBIN is strengthening its balance sheet by creating higher provisions toward stressed accounts. The bank increased its PCR (including TWO) to ~88% in 1QFY21 from ~65% in 1QFY18. SBIN holds higher provision coverage on power NPAs (~73% PCR) than peers.
- SBIN does not have exposure to any large-ticket corporate account; thus, it has guided for slippages + restructuring to remain at ~2.5% during the COVID-19 crisis. Also, CE of the domestic book at ~97% is in line with other large banks. Furthermore, total COVID-19 provisions of INR71b, including INR32b toward potential slippages, provides comfort.
- Among PSU banks, SBIN remains the best play on the gradual recovery in the Indian economy, with healthy PCR of 71% (88% including TWO), robust capitalization (Tier 1 of ~11.9%), strong liability franchise and improved core operating profitability.

Core bank trades at cheap valuation of 1.3x FY22E Core PPoP and 3.1x FY22E P/E. Buy with a target price of INR300: SBIN's performance has been healthy in a challenging environment. Asset quality outlook is better with improvement in CE to 97% (in-line with large private peers). The bank expects total asset quality impact of INR600b (2.6% of net advances) including restructuring of <1%. SBIN has also prudently improved PCR over the last few years; corporate PCR now stands at 88%. Thus, we believe the earnings normalization cycle for SBIN has begun as the uncertainty brought about by the COVID pandemic has receded significantly. Also, SBIN has strong franchise, both in assets and liabilities, and is gaining market share unlike other PSBs, which have lost market share to private players. Current valuations too are extremely compelling with the core bank trading at 0.4x FY22E ABV (1.3x FY22E P/Core PPoP and 3.1x FY22E P/E). RoEs should also recover to 14.2% by FY23E. Thus, we believe a rerating in the stock is imminent. Reiterate Buy with TP of INR300 (0.7x Sep'22E ABV).

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

or Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Securities (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

Motilal Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA.
