About the product

As the tagline suggests, **BULLS & BEARS** is a monthly handbook on valuations in India. It covers:

- Valuations of Indian market vs. global markets
- Current valuations of companies across sectors
- Sectors that are currently valued at a premium/ discount to their historical long-period average

NOTES:

- Prices as of month-end Sep'25
- BULL icon: Sectors trading at a premium to their historical averages
- BEAR icon: Sectors trading at a discount to their historical averages
- Valuations are on a 12-month forward basis, unless mentioned otherwise
- Sector valuations are based on MOFSL coverage companies
- Data on global equities is sourced from Bloomberg; Nifty valuations are based on MOFSL estimates

Investors are advised to refer to the important disclosures appended at the end of this report.

Strategy

Markets end in green; FII outflows and DII inflows at a record high in CY25YTD

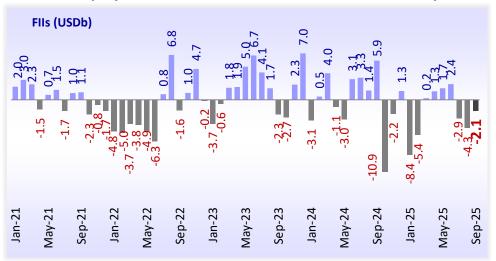

- Markets experience elevated volatility and manage to close in green in Sep'25: The Nifty closed in green (up 0.8% MoM) in Sep'25 after two straight months of decline. Notably, with extreme volatility, the index hovered around 1,016 points before closing 184 points higher. The Nifty is still up 4.1% in CY25YTD. The Nifty Smallcap 100 (+1.9% MoM) and Nifty Midcap 100 (+1.4% MoM) outperformed the Nifty-50 during the month. Over the last 12 months, largecaps, midcaps, and smallcaps have declined 4.6%, 6%, and 8.4%, respectively. Over the last five years, midcaps (CAGR: 27.2%) have significantly outperformed largecaps (CAGR: 17%) by 114%, while smallcaps (CAGR: 24.7%) have markedly outperformed largecaps by 83%.
- DII inflows vs. FII outflows the persisting tug of war: In Sep'25, FIIs recorded the third consecutive month of outflows at USD2.1b. FII equity outflows were the highest ever, reaching USD17.5b in CY25YTD vs. outflows of USD0.8b in CY24. DII inflows continue to remain strong at USD7.4b in Sep'25. DII equity inflows were at a record high of USD66.7b in CY25YTD vs. USD62.9b in CY24.
- All major sectors end higher in Sep'25: Among the sectors, PSU Banks (+11%), Metals (+10%), Automobiles (+6%), Utilities (+5%), and Capital Goods (+4%) were the top gainers MoM, while Technology (-4%), Media (-4%), Consumer (-3%), and Healthcare (-2%) were the only laggards. The breadth was balanced in Sep'25, with 25 Nifty stocks ending higher. Eicher Motors (+15%), Bajaj Finance (+14%), Adani Enterprises (+12%), JSW Steel (+11%), and Bharat Electronics (+9%) were the top performers, while Trent (-12%), Titan (-7%), Asian Paints (-7%), TCS (-6%), and Jio Financial (-6%) were the key laggards.
- Major economies end higher in Sep'25: Among the key global markets, Korea (+7%), MSCI EM (+7%), Taiwan (+7%), Japan (+5%), the US (+4%), Brazil (+3%), Indonesia (+3%), the UK (+2%), India (+1%), and China (+1%) ended higher in local currency terms on MoM in Sep'25. Over the last 12 months in USD terms, the MSCI India Index (-12%) underperformed the MSCI EM Index (+15%). Over the last 10 years, the MSCI India Index notably outperformed the MSCI EM Index by 46%. In P/E terms, the MSCI India Index is trading at a 54% premium to the MSCI EM Index, below its historical average premium of 79%.
- Valuations two-thirds of the sectors trade at a premium to their historical averages: The Nifty now trades at a 12-month forward P/E of 20.6x, near its LPA of 20.7x (1% discount). Conversely, the P/B ratio at 3.1x represents a 9% premium to its historical average of 2.9x. The market capitalization-to-GDP ratio now stands at 125% of FY26E GDP (10.5% YoY), well above its long-term average of 87%. Automobiles, Consumer, Technology, and Real Estate now trade near their long-period average (LPA) valuations, while Capital Goods, PSU Banks, NBFCs, and Utilities trade at a premium to their LPA.
- Our view: We believe that the government is committed to lifting and stimulating the Indian economy in the face of frosty global headwinds, weak private capex, and sub-optimal consumption. The latest GST reform will be the first big structural reform of the government in the current term. In our view, the proactive steps of the government in tandem with the RBI's stimulus measures have kick-started a cycle of positive uptrends for the Indian equity market, which has been a key underperformer over the past 12 months (Nifty -4.6% YoY). The current valuation at ~20.6x (vs. LPA of 20.7x) is reasonable and has room to expand given our expectations of double-digit PAT growth for Nifty/MOFSL. While our model portfolio bias remains towards largecaps (~70% weight), we have turned more constructive towards mid-caps (with 22% weight vs. 16% earlier) owing to better earnings delivery and improving prospects. We are OW on BFSI, Consumer Discretionary, Industrials, Healthcare & Telecom, while we are UW on Oil & Gas, Cement, Real Estate, and Metals.
- Top ideas: Largecaps Bharti Airtel, ICICI Bank, Larsen & Toubro, Mahindra & Mahindra, Ultratech Cement, Titan Company, Max Healthcare, Eternal, Bharat Electronics, Tech Mahindra, TVS Motors, Macrotech, and Indian Hotels. Midcaps and Smallcaps Dixon Technologies, SRF, Suzlon Energy, Jindal Stainless, Coforge, Supreme Industries, Page Industries, Kaynes Tech, Radico Khaitan, VIP Industries, UTI AMC, and Niva Bupa Health.

Deep-dive

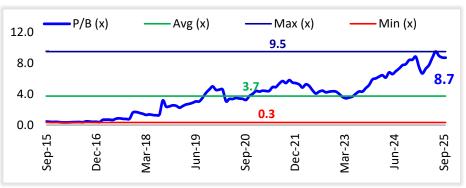

NBFC Non-lending: Valuations turn attractive for a few players

- Non-lending NBFCs are currently trading at a P/E multiple of 33.9x, which is significantly above their long-term average of 17.0x. Following the recent stock price correction driven by regulatory headwinds, we believe valuations have turned attractive in certain stocks, although a degree of regulatory overhang persists in others, which may result in further corrections.
- ▶ Brokers such as Angel One are trading at a P/E of ~17x, which, while still above the average of 15.5x, has witnessed a sharp correction in recent months due to regulatory headwinds and prevailing negative market sentiments that have impacted growth. Exchanges have similarly experienced corrections, with BSE now trading at 43.8x, primarily as a result of the impact of F&O regulations and the continued overhang of regulatory uncertainties surrounding the derivatives segment. Meanwhile, MCX is trading at 42.7x, which is broadly in line with average, although its key growth drivers remain contingent upon product approvals and further improvement in market participation.
- AMCs have witnessed an expansion in P/E multiples, supported by improving fund performance, strong and sustained flows, as well as cost efficiencies that are driving growth and profitability. Among the players, HDFC AMC has emerged as the strongest performer, trading at a P/E of 38.7x, which is above its average, followed by NAM at 34.0x. In contrast, ABSLAMC is currently trading at a relatively attractive valuation of 21.2x, supported by a visible improvement in fund performance.
- Depositories are currently trading at elevated valuations, supported by robust IPO activity and a recovery in the cash market. MF RTAs have witnessed some degree of correction owing to yield compression. CAMS is trading at a relatively attractive valuation of 35.0x, which stands below average.
- ➤ Wealth managers have experienced a sharp decline in P/E multiples, primarily due to rising cost pressures, supply-side challenges, and regulatory actions that have adversely impacted profitability. Within the sector, 360 ONE continues to trade at an above-average P/E, whereas Nuvama is trading at a relatively attractive valuation of 18.7x, which is in line with the average, following the impact of the Jane Street episode.

Sector valuations

Two-thirds of the sectors trade at a premium to their historical averages

- Technology is trading at a P/E ratio of 20.9x, near its 10-year average of 21.4x (2% discount). Valuations are no longer the hurdle for IT, but questions around structural demand persist. GenAl-driven productivity gains, while inevitable, are fueling near-term pricing and commercial pressure. The sector faces three key headwinds: muted demand, deflation from productivity gains, and potential limits to onsite expansion from an uncertain H1B regime.
- Automobiles is trading at a P/E of 26.5x, near its 10-year historical average of 26.3x. Auto stocks have recently seen a resurgence with market recovery. GST cuts have provided the much-needed booster shot to the auto sector by reducing tax rates on the majority of auto segments. These timely cuts, coupled with other sectoral tailwinds such as the normal monsoon boosting rural sentiment, interest rate cuts, and income tax benefits, are expected to revive demand for the auto sector from this festive season.
- The PSU Banks sector now trades at a P/B of 1.2x, reflecting a 36% premium to the historical average of 0.9x. PSBs reversed a decade-long trend of market share erosion, regaining ~40bp in FY25 to ~58%, supported by healthy credit growth, outpacing private banks in loan growth for the first time in 15 years (12% vs. 10%), driven by momentum in retail and MSME segments. PSBs are expected to face further margin pressure in 2QFY26 due to the repricing of repo-linked loans and are likely to stabilize by 3Q and recover thereafter, supporting healthy NII growth over FY27-28E.

Automobiles

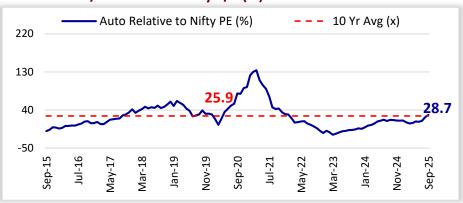

GST cuts and normal monsoons drive demand revival

- The Auto sector is trading at a P/E of 26.5x, near its 10-year historical average of 26.3x. Auto stocks have recently seen a resurgence with market recovery. GST cuts have provided a much-needed booster shot to the auto sector by reducing the tax rates on the majority of auto segments. These timely cuts, coupled with other sectoral tailwinds like the normal monsoon boosting rural sentiment, interest rate cuts and income tax benefits, are expected to revive demand for the auto sector from this festive season.
- Retail demand was weak for the first three weeks of Sep'25 due to the Shradh period and delayed purchases of customers to benefit from the revised GST rates. Hence, the Navratri festival this time has been strong for all OEMs, boosted by strong pent-up demand and the GST rate cuts.
- Overall, we expect 2Ws/PVs/CVs/tractors to post 13%/6%/3%/11% growth in wholesale in Sep'25.

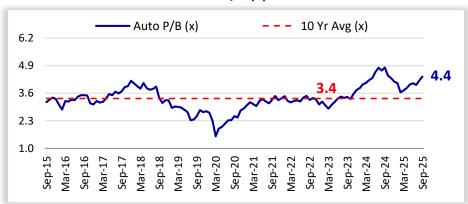

12-month forward Automobiles P/E (x)

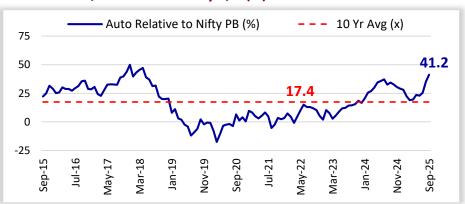

Automobile P/E relative to Nifty P/E (%)

12-month forward Automobiles P/B (x)

Automobile P/B relative to Nifty P/B (%)

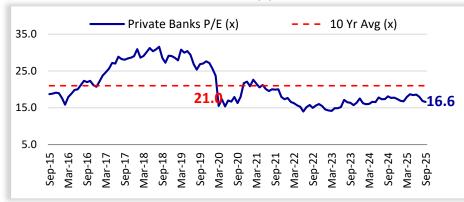

Private Banks

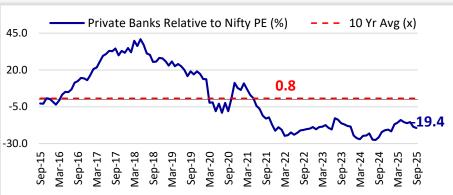

Performance remains divergent; earnings growth on the cusp of a turnaround

- The Private Banks sector is currently trading at a P/B ratio of 2.2x, at a 10% discount to its historical average of 2.5x. The Nifty Private Bank Index is flat over the past 12 months. The banking system has witnessed a deceleration in credit growth at ~10% YoY, led by moderation in key retail and corporate segments. The reduction in GST rates coupled with lagged benefits from the cut in income tax rates is expected to drive demand and aid loan recovery over 2HFY26. We expect 11% credit growth for FY26, with growth recovering further to ~13% for FY27E.
- NIMs are expected to decline further in 2Q. However, most banks have already implemented SA and TD rate cuts, and the phased reduction in CRR, effective Sep'25, should help recoup margins in 2H.
- Delinquencies in the unsecured retail segment show early signs of easing, but challenges persist in cyclical sectors like CV loans. Large private banks with more diversified and secured portfolios continue to fare better.

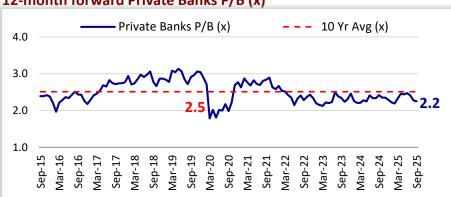

12-month forward Private Banks P/E (x)

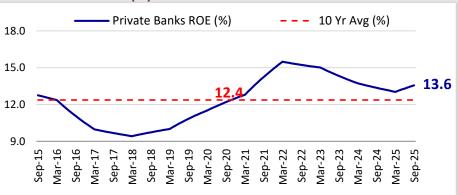

Private Banks P/E relative to Nifty P/E (%)

12-month forward Private Banks P/B (x)

Private Banks ROE (%)

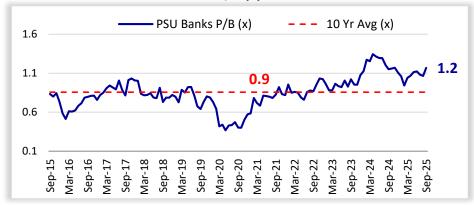

PSU Banks

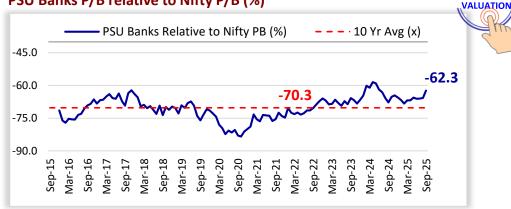

Modest earnings growth amid margin pressure

- The PSU Banks sector now trades at a P/B of 1.2x, reflecting a 36% premium to the historical average of 0.9x.
- PSBs reversed a decade-long trend of market share erosion, regaining ~40bp in FY25 to ~58%, supported by healthy credit growth, outpacing private banks in loan growth for the first time in 15 years (12% vs. 10%), driven by momentum in retail and MSME segments.
- PSBs are expected to face further margin pressure in 2QFY26 due to the repricing of repo-linked loans and are likely to stabilize by 3Q and recover thereafter, supporting healthy NII growth over FY27-28E. Alongside, PSBs are cautiously rebalancing their asset mix to higher-yielding RAM loans.
- Slippages remained well-contained for most PSBs, supported by minimal exposure to unsecured lending. The GNPA ratio was stable or lower across the board, with PCR levels healthy at ~75-90%.
- The RoA for PSBs has largely matured, and we expect earnings growth to remain modest. We estimate PSB earnings growth to be sustained at a 14% CAGR over FY26-28 vs. a 38% CAGR over FY22-25.

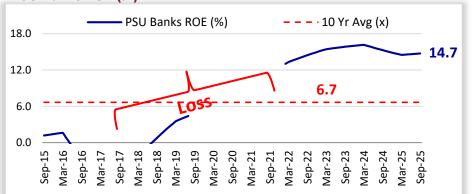

12-month forward PSU Banks P/B (x)

PSU Banks P/B relative to Nifty P/B (%)

PSU Banks ROE (%)

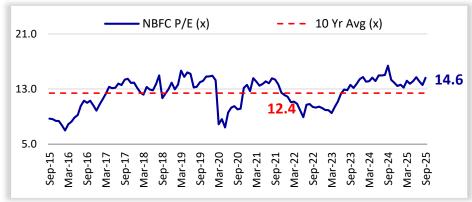

NBFC

Weak asset quality trends in vehicle & unsecured MSME; gold loan growth remains strong

- Stress in CV, unsecured business loans, and the micro-LAP segment have continued to remain elevated. The weakening asset quality in the micro-LAP segment appears to stem from stress initially seen in unsecured small-ticket loans and now gradually spilling into the small-ticket space. Stress in unsecured MSMEs is attributed to leverage, with select customers having multiple loans.
- Demand trends remained muted across most segments, with the exception of gold loans and affordable housing (for select players), where demand appears relatively strong. Vehicle volumes have picked up after 22nd Sep, driven by pent-up demand and the GST rate cuts coinciding with Navratri. NIM tailwinds for vehicle financiers and affordable housing financiers will continue. Large HFCs will likely exhibit a transitory NIM compression.
- The MFI industry continues to show directional improvement, but the recovery is slower than earlier expected. Flow rates are still declining, though the pace of improvement moderated in Jul-Sep'25, suggesting a possible plateau after the sharper reductions in flow rates seen earlier. We expect a stronger recovery in NBFC-MFI franchises in 2HFY26.

NBFC P/E relative to Nifty P/E (%)

12-month forward NBFC P/B (x)

NBFC ROE (%)

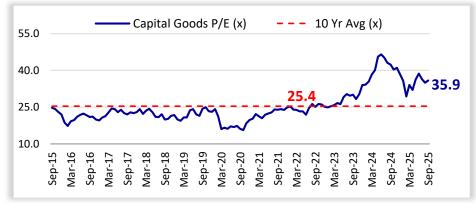

Capital Goods

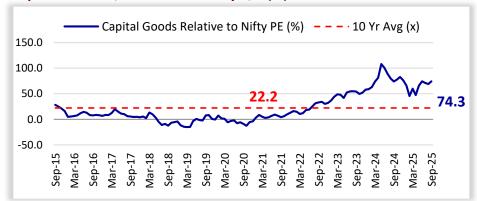

Base-ordering momentum sustains, large-sized ordering picking up

- The Capital Goods sector is trading at 35.9x one-year forward P/E, above its 10-year avg. of 25.4x (at a 41% premium), indicating a premium valuation. This premium has bounced back from the six-month lows on selective recovery in government capex, though private sector ordering is yet to witness meaningful pickup. On a P/B basis, it is trading at 6.7x, reflecting a 70% premium to its 10-year average multiple of 4x.
- Ordering activity across industrials, defense, and railways remained stable, supported by a robust pipeline in transmission, defense, and renewables, with few large orders finalized during the month. Private sector demand remained weak and limited to new-age sectors and power utilities, particularly thermal and renewables. Traditional segments like steel, petrochemicals, and cement were sluggish, while T&D, renewables, railways, and defense drove inflows. International demand stayed strong in renewables and EPC.
- While broad-based momentum is still building, we expect a pickup in 2HFY26. A selective approach remains prudent, with preference for companies with strong execution capabilities, order book visibility, and exposure to high-growth segments.

Capital Goods P/B relative to Nifty P/B (%)

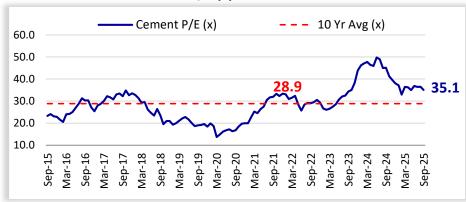

Cement

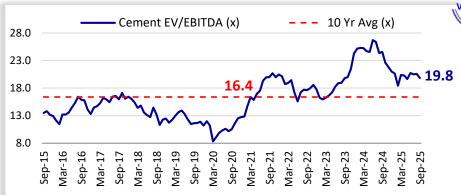

Demand slow in Sep'25; recovery expected in the coming months

- The Cement sector is trading at a one-year forward EV/EBITDA of 19.8x, reflecting a ~21% premium to its historical average of 16.4x.
- Cement demand was weak in Sep'25 due to the extended monsoon across major parts of the country. We estimate cement demand to grow ~4-5% YoY in 2QFY26. Demand is likely to rebound in coming months as the monsoon recedes and construction activities pick-up. Further, the GST rate cut (to 18% from 28%) is a positive catalyst for the cement sector.
- Cement prices have seen marginal correction in Jul-Aug'25, while the Sep'25 prices remained stable despite subdued demand. Given the reduction in the GST rates, cement WSP has been reduced to pass on the benefits to the consumer. Consequently, the all-India average cement price (WSP) declined by INR27 per 50-kg bag in the last week of Sep'25. Secondly, imported petcoke prices increased ~6% MoM to USD115/t in Sep'25. However, the imported coal price (South African) declined ~3% MoM to USD87.

Consumer

GST reforms impact short-term sales and margins

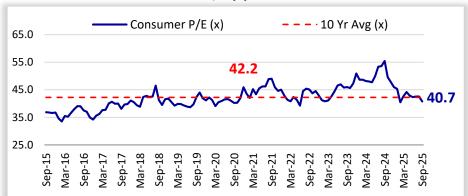

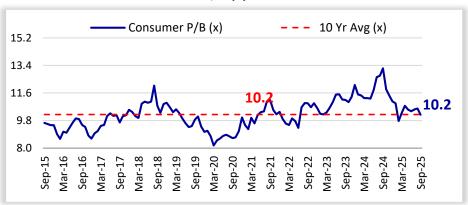

• Some companies have provided discounts to channel partners to maintain demand, which may put pressure on margins in the near term.

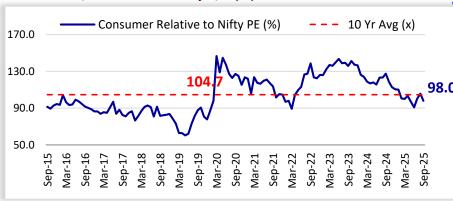

12-month forward Consumer P/E (x)

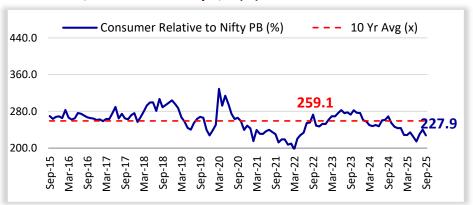

12-month forward Consumer P/B (x)

Consumer P/E relative to Nifty P/E (%)

Consumer P/B relative to Nifty P/B (%)

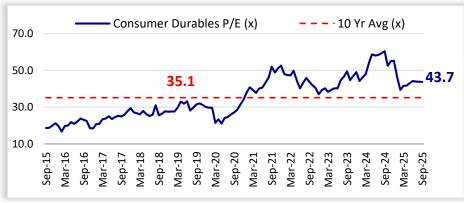

Cons. Durables

Consumer demand likely to boot; C&W outlook positive

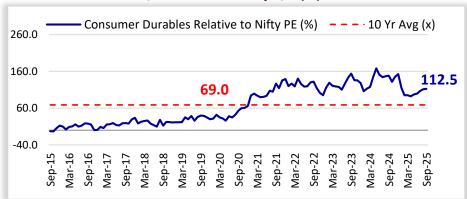

- The Consumer Durables sector trades at a one-year forward P/E multiple of 43.7x, reflecting a 24% premium to its 10-year average P/E of 35.1x.
- On a P/B basis, the sector trades at 7.5x, at ~33% premium to its 10-year average multiple of 5.6x.
- Initially customers delayed purchases due to the announcement of the GST rate cuts on RAC and LED TV w.e.f. 22nd Sep'25. Further, the channel inventory was also high due to the weak season. However, sales is estimated to boost in the near to medium term.
- C&W continued to witness robust demand supported by power sector expansion, infrastructure investments, real estate recovery, and emerging segments like EVs and data centers. Further, sustained raw material price increases (copper/aluminum prices up 6%/9% QoQ in 2QFY26) are aiding revenue growth.

Chemicals

Prices remain rangebound amid stable oil prices

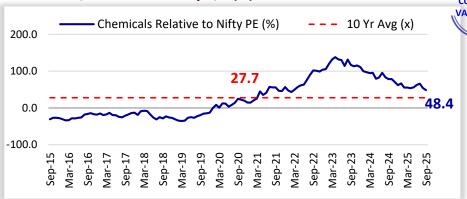

- The Brent crude oil price averaged USD68/bbl in Sep'25 (vs. 67.9/bbl in Aug'25).
- Toluene increased 3% MoM, while benzene prices declined 2% MoM. Acetone/Acetonitrile prices decreased 4%/2% MoM, while Methanol increased 6%. Aniline prices / Phenol prices decreased 3%/2% MoM. IPA prices increased 4% MoM, while Acetic Acid prices dipped 4% MoM.
- Oil prices remained stable MoM despite oversupply and weak demand. This stability was established due to geopolitical risk and an aggressive increase in China's crude imports and stockpiling.

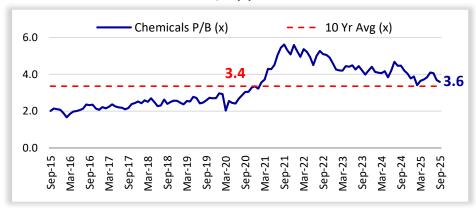

12-month forward Chemicals P/E (x)

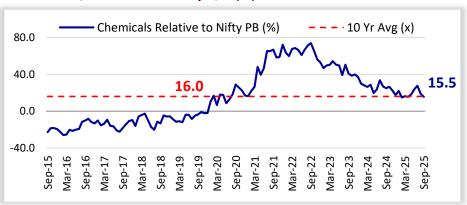

Chemicals P/E relative to Nifty P/E (%)

12-month forward Chemicals P/B (x)

Chemicals P/B relative to Nifty P/B (%)

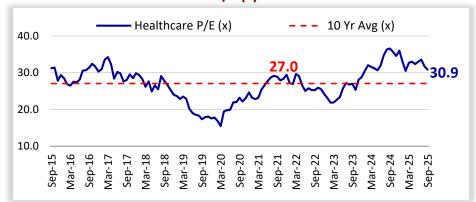

Healthcare

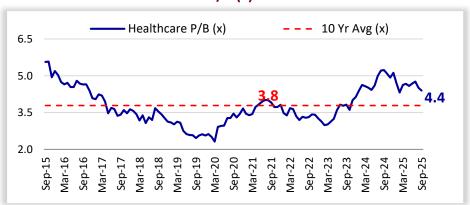

Near-term concerns weigh on valuations; long-term prospects remain encouraging

- The Healthcare sector's P/E multiple has been stable for the past two months at 30.9x, above its historic average of 27x (14% premium). However, the valuation of the healthcare sector was on the rise from Mar'23 until Jan'25. Subsequently, there has been deceleration in the valuation multiples of the healthcare sector to date.
- The export-related policy headwinds have been hurting the valuations of the sector. While generics have been insulated to date from any policylevel changes, the apprehension of adverse policy by the US on imports related to tariffs has kept sector valuations under check. In addition, competition in certain key products and time lag for new launches have also kept growth in the US exports under check.
- While the GST-related announcement by the Indian govt. is expected to have minimal impact on the demand for medicines, the transitionary phase of shifting to the new GST rate is likely to reduce off-take in primary sales over the near term in the domestic formulation/consumer health segment.
- Hospitals are on a consistent growth path aided by bed additions through brownfield/greenfield routes as well as optimizing existing operations by reworking the case mix/payor mix. The ongoing dispute with insurance players needs to be monitored closely to understand the overall impact.

Healthcare P/B relative to Nifty P/B (%)

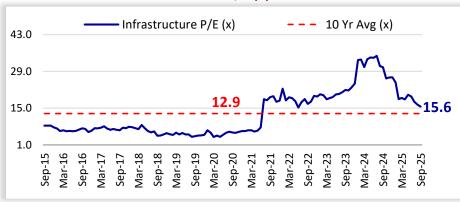

Infrastructure

NHAI's order awarding remains muted; toll collections surge YoY

- The Infrastructure sector is trading at a P/B of 1.2x, which is at its long-term historical average of 1.2x.
- NHAI's project awarding was muted YTD, with just ~277km being awarded during the period. However, awarding is expected to ramp up in 2HFY26 after below-par awarding activities in FY24 and FY25. Muted awarding activity by NHAI and fierce competition in NHAI projects from new and inexperienced players have impacted order inflows for large players. However, NHAI, via a press release dated 17th Sep'25, has tightened RFP provisions to ensure the projects are awarded only to contractors with proven technical and financial competence, which will have a positive impact on order inflows going forward for the EPC companies.
- Toll collections increased 25.7% YoY to INR71b in Aug'25, with a daily run rate of ~INR2.28b (up ~25.7% YoY).

12-month forward Infrastructure P/E (x)

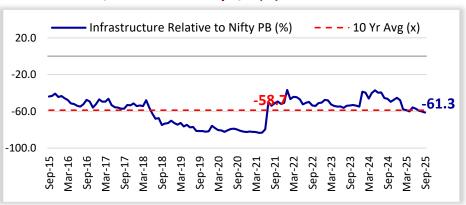

Infrastructure P/E relative to Nifty P/E (%)

12-month forward Infrastructure P/B (x)

Infrastructure P/B relative to Nifty P/B (%)

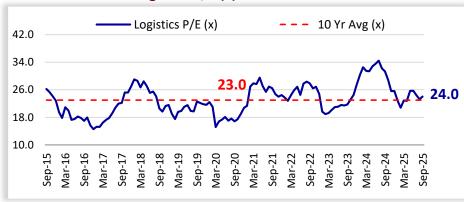

Logistics

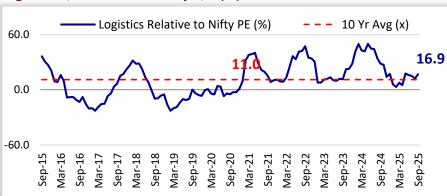

Activity picks up, which indicates signs of recovery on a YoY basis

- The Logistics sector is trading at a P/E ratio of 24x, above its historical average of 23x (at a 4% premium).
- Logistics operations are showing signs of recovery on a YoY basis. Fleet utilization was ~80%. Daily avg. FASTag toll collections rose ~25.7% YoY in Aug'25. Toll collection YTD was up ~21% vs. ~10% during Apr-Aug in FY25.
- Volume growth is expected to improve with better-than-expected monsoons and recently reduced GST across products in an attempt to improve
 consumption across the economy. The improvement in consumption will support volumes for logistics companies.
- With a structural shift in the formalization of the sector (~85% of the logistics sector is unorganized), aided by the stricter implementation of GST and mandatory e-invoicing, the addressable market size for organized operators will improve going forward.

VALUATION

Media

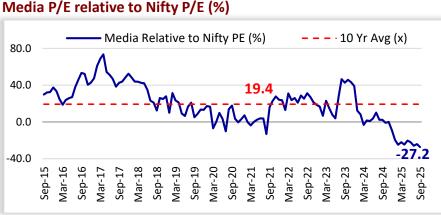

Trump imposes 100% tariffs on all movies made outside the US

- The P/E ratio for the Media sector, at 15x, is at a 39% discount to its 10-year historical average of 24.7x.
- US President Donald Trump announced plans to impose a 100% tariff on all foreign-made movies, signaling a move to extend protectionist trade policies to cultural industries. Trump claimed US filmmaking is losing out to international competition, but details on the legal authority and implementation remain unclear.
- The Karnataka High Court has reserved its decision on petitions challenging the state's Rs 200 movie ticket price cap. The Multiplex Association of India argues the cap, implemented via amended rules, violates constitutional rights and restricts business.

VALUATION

Metals

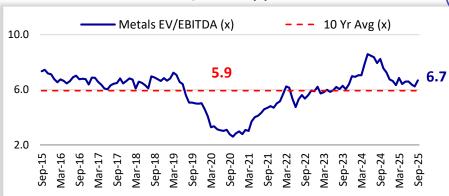

Muted prices; outlook positive on receding monsoons and demand tailwinds

- The Metals sector trades at 6.7x EV/EBITDA, above its 10-year historical average of 5.9x amid price recovery over receding monsoon and demand tailwind, while some concerns over geopolitical disruption remain intact.
- Flat steel prices softened marginally by INR500/t MoM to INR49,500/t in Sep'25, whereas rebar prices corrected further by INR800/t MoM to INR47,250/t, driven by seasonal weakness.
- Coking coal price remained rangebound between INR180 and INR200/t; currently it stood at USD200/t in Sep'25, driven by supply constraints in China.
- Non-ferrous metal prices continue to remain largely flat MoM in Sep'25.

VALUATION

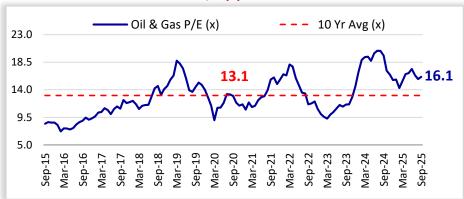

Oil & Gas

Brent prices remain stable; marketing margins contract

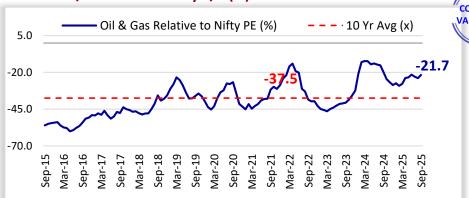

- Brent crude oil prices remained flat at USD68/bbl in Sep'25, vs. USD67.9/bbl in Aug'25, as oversupply and weak demand were balanced by geopolitical risks as well as an aggressive increase in China's crude imports and stockpiling.
- SG GRM remained flat at USD4/bbl in Sep'25 from USD4/bbl in Aug'25. Diesel/Gasoline cracks stood at USD12.1/12.2 per bbl in Sep'25 (up 13%/up 15% MoM).
- Gross marketing margin for petrol/diesel declined 12%/11% MoM to 9.6/6.6 per lit in Sep'25. The spot LNG price was USD11.3/mmBtu in Sep'25 (vs. USD11.6/mmBtu in Aug'25).

Real Estate

Record leasing momentum in India's industrial & logistics markets in 1HCY25

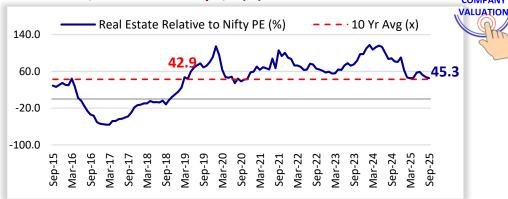

- The Real Estate sector is trading at a P/E of 29.9x, at its 10-year historical average of 29.8x.
- As per Cushman and Wakefield, residential launches fell to 15,388 units in 2QFY25, down 19% QoQ and 9% YoY, marking a 15-quarter low due to weak demand and oversupply pressures. The slowdown reflects a reversal of the previous trend of premium project inflows, with developers exercising caution.
- Navi Mumbai led with 5,986 units (39% share), followed by Extended Western Suburbs (23%), with affordable hubs like Panvel and Naigaon driving over 5,000 units. The ongoing and upcoming infrastructure projects such as MTHL, Navi Mumbai Metro, and the new International Airport continue to boost interest in these submarkets.
- Mid-segment launches dominated at 65% of supply, while capital values dipped 8% QoQ to INR 19,702/sq. ft. even as rents rose modestly by 1–3% in 3Q25. The shift toward budget-friendly apartments underscores changing buyer preferences amid limited premium demand.

Retail

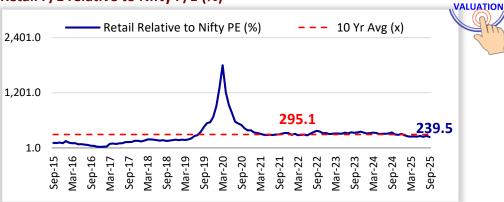

Festive e-commerce sales surge following GST cuts

- The Retail sector is trading at a P/E ratio of 69.8x, which is at a 14% discount to its 10-year historical average of 81x.
- GST reforms, effective from September 22, have significantly boosted festive demand, with a 23-25% increase across metropolitan and emerging markets. Reduced tax rates on electronics, fashion, and furniture have lowered retail prices, encouraging aspirational purchases and increased spending in tier 2 and 3 cities.
- India is considering easing foreign investment rules to let e-commerce firms like Amazon buy products directly from Indian sellers for export. Currently, foreign platforms can only act as marketplaces. The proposal, aimed at boosting global e-commerce exports, would apply only to exports and include strict penalties for violations. Cabinet approval is required before implementation.

Technology

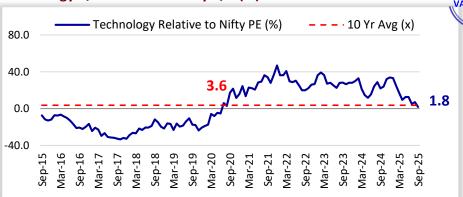

Sustained recovery hinges on a new tech-spending wave

- The sector is trading at a P/E ratio of 20.9x, near its 10-year average of 21.4x (2% discount). Valuations are no longer the hurdle for IT, but questions around structural demand persist. GenAl-driven productivity gains, while inevitable, are fueling near-term pricing and commercial pressure. The sector faces three key headwinds: muted demand, deflation from productivity gains, and potential limits to on-site expansion from an uncertain H1B regime.
- Mid-tiers, once resilient, are now slowing as growth moderation collides with macro uncertainty. Unlike past transitions where digital or cloud spending offset legacy drag, this cycle lacks a budgetary kicker. Deflation in legacy services is not new. Historically, however, each tech transition cycle has triggered a growth spurt. This time, GenAI is making the legacy drag worse, but the anticipated wave of GenAI-led spending is yet to materialize, prolonging the slowdown and muddying the recovery.
- Margins are suffering across the board, potentially entering a painful phase of realignment as firms experiment with pricing and delivery models. A sector re-rating will require the next technology cycle to take hold and sustained upgrades to earnings outlooks.

Telecom

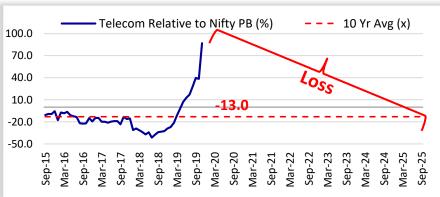

Vodafone Idea moves Supreme Court to seek waiver from interest and penalty on AGR dues

- The Telecom sector is trading at an EV/EBITDA ratio of 9.9x, reflecting a 10% premium to its 10-year historical average of 8.9x.
- Cash-strapped Vodafone Idea has filed a plea in the Supreme Court, seeking a waiver from interest, penalty, and interest on penalty on its Adjusted
 Gross Revenue (AGR) dues. The telco argues its non-payment was bona fide due to conflicting judicial views on AGR computation. This crucial
 application aims to alleviate its substantial outstanding debt and ensure survival.
- Starlink's upcoming satellite internet trials in India face challenges due to high costs, nearly ten times pricier than existing fiber plans. Aimed at remote areas, it's unlikely to threaten urban broadband services. While promising 99% availability, it's a secondary option in fiber-rich zones. Direct-to-cell tech poses no immediate threat to India's wireless sector.

VALUATION

Utilities

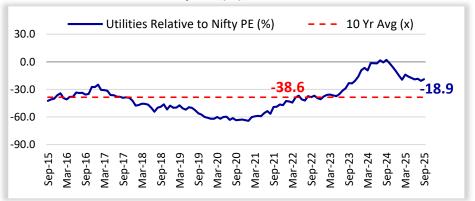

Moderate demand growth and capacity expansion continue

- The Utilities sector is currently valued at a P/B ratio of 2.3x and a P/E ratio of 16.7x, representing premiums of 46% and 30%, compared to their historical averages of 1.6x and 12.8x, respectively.
- India's peak power demand rose to ~230GW in Aug'25, up from 217 GW Aug'24.
- In Aug'25, power demand displayed moderate growth at 4% YoY, reaching ~150BUs despite a heavy monsoon.
- India's power generation capacity expanded by 6.3GW in Aug'25, primarily led by renewable energy additions of 4.7 GW (comprising 4.1 GW solar and 0.6 GW wind). Additionally, 0.5 GW of hydro and 1.1 GW of coal-based thermal capacity were commissioned during the month.
- On the transmission front, 309ckm of lines were added during Aug'25, falling short of the monthly target of 521ckm.

NOT RATED	We have forward looking estimates for the stock but we refrain from assigning recommendation		

*In case the recommendation given by the Research Analyst is inconsistent with the investment rating legend for a continuous period of 30 days, the Research Analyst shall within following 30 days take appropriate measures to make the recommendation consistent with the investment rating legend.

Disclosures:

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL),NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at http://onlinereports.motilaloswal.com/Dormant/documents/Associate*20Details.pdf

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx

MOFSL, it's associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

In the past 12 months, MOFSL or any of its associates may have:

- a. received any compensation/other benefits from the subject company of this report
- b. managed or co-managed public offering of securities from subject company of this research report.
- c. received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- d. received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.
- MOFSL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
- · Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
- Research Analyst may have served as director/officer/employee in the subject company.
- MOFSL and research analyst may engage in market making activity for the subject company.
- · MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:
- a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.

(b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures.

To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement

Companies where there is interest

Analyst ownership of the stock

No

A graph of daily closing prices of securities is available at www.nseindia.com, www.nseindia.com, <a href="www.nseindia.com, Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and under

applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

Nainesh Raiani

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL. Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form. without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
