CMP: INR287 TP: INR350 (+22%) Buy

Asset quality deteriorates; spike in credit cost dents earnings

- 2QFY20 PAT was down 73% YoY to INR543m led by increased provisions of INR5.3b (+150% QoQ); the bank had made provisions of INR3.5b toward identified stressed accounts. For 1HFY20, PPOP was up 42% YoY to INR12.5b while PAT declined 19% YoY to INR3.2b.
- GNPL/NNPL increased 95%/145% QoQ to INR15.4b/INR9.1b led by elevated slippages of INR13.8b. The bank disclosed stressed pool of INR18b (earlier guided at INR9-10b), which includes four groups (a group based in the East, a diversified media group, a coffee group based in the South and a plastics group based in the West + a buffer), of which INR8b has slipped during the quarter while the remaining would be recognized in subsequent quarters.
- NII grew 46% YoY to INR8.7b, led by 4bp QoQ expansion in the margin to 4.35%. Core fee income moderated at 19% YoY (5% QoQ decline) to INR3.9b driven by moderation in loan growth.
- Loan book moderated to 27% YoY led by slowdown in the wholesale book, which grew 12% YoY while strong growth in the retail book continued (+62% YoY). The share of non-wholesale book increased by 190bp QoQ to ~48%. Deposit base increased 31% YoY led by robust 68% YoY increase in SA deposits. CASA ratio increased to 26.5% (+70bp QoQ).
- Other highlights: (i) Tier-1 ratio remains flat QoQ at 11.3%, (ii) MFI book increased ~4% QoQ to INR51.5b (8.8% of total loans), (iii) Cards portfolio grew to 2.3m (2.0m in 1QFY20), while credit card book grew 122% YoY to INR80b (13.7% of total loans).
- Valuation view: RBK's exposure to the stressed exposures has increased further while coverage ratio has declined sharply. Management has guided for elevated slippages from the stressed pool over the coming quarters before normalization of earnings. However, the sluggish economic environment and RBK's chunky exposure to BBB/BB & below pool remains a concern. Strong growth in the retail business was led by cards/MFI and the robust margins do provide some cushion to its operating performance. But higher slippages and in turn, higher credit cost drives a sharp cut in our FY20/FY21 estimates. We, thus, estimate FY20 PAT to decline 20% YoY before earnings begin to normalize in FY21. Capital raise in 2HFY20 is critical for supporting growth and shoring up Tier-1 ratio. We revise our TP to INR350 (1.6x FY21E BV). Maintain Buy.

RBK disclosed stressed pool of INR18b toward four groups; of which, INR8b has been recognized as NPA

Asset quality outlook concerning; slippages likely to increase in near term

- During 2QFY20, absolute GNPAs increased 95% QoQ as annualized slippages elevated to 3.7% (INR13.8b) as bank recognized INR8b of the stressed exposure in the current quarter. Recoveries came in at INR550m while write-offs more than doubled to INR3.1b. In percentage terms, GNPA/NNPA increased sharply by 122bp/91bp QoQ to 2.60%/1.56%. Calculated PCR declined ~1200bps QoQ to 40.7% (58.5% including TWO).
- Management disclosed a stressed pool of INR18b pertaining to four groups (East-based group, diversified media group, south-based coffee group and west-based plastics group plus a buffer) of which INR8b has been recognized as NPA while the remaining would be recognized in the coming quarters. Bank has made a provision of INR3.5b towards the above NPA accounts. SMA 1 and SMA 2 for the bank stand at 0.45% and 0.39% respectively.
- Further the mix of BB and below book has increased by 280bp QoQ to 9.8% vs 7.0% in 1QFY20.

Loan growth moderated to ~28% YoY; driven by non-wholesale loan growth of ~49% YoY.

Loan growth driven by retail book; retail mix increases by ~190bp QoQ

- Loan growth moderated to ~28% YoY was primarily led by non-wholesale growth of ~49% YoY, while wholesale grew by ~12% YoY, taking the retail book share to 47.9% from 40.9% a year ago. Within the non-wholesale book, the retail segment grew ~62% YoY, while the DB&FI segment grew 24.1% YoY.
- Wholesale loans grew ~12% YoY (-0.8% QoQ), led by 17.6% YoY (+0.7% QoQ) growth in the C&IB segment while CB segment declined 0.8% QoQ (+0.3% YoY).

Exhibit 5: Share of retail business increased to 48%

Margins improve 4bp QoQ to 4.35% due to increase in yields by 10bp QoQ

- The bank reported a 4bp QoQ improvement in margins to 4.35% (+27bp YoY). This was led by an improvement in yields on advances (+10bp QoQ), driven by a higher share of high-yielding book.
- CASA deposits increased 42.2% YoY (6.1% QoQ), led by robust 68% (+0.8% QoQ) increase in SA deposits, while CA deposits increased by 14.9% YoY (+15.5% QoQ). The, CASA ratio improved by 200bp YoY to 26.5%.

2QFY20 conference call highlights

Balance sheet and P/L related

- The bank is not witnessing any signs of deterioration in the operating environment/delinquency trends in the retail segments that it operates.
- **Real estate book:** Exposure of INR25b, of which the largest exposure of INR5b is fully secured.
- Credit cards: On a proactive basis, the bank has reduced card limits or balance wherever it has seen some stress.
- Industry average ROA in the cards business is 3.5%.
- The bank is having excess G-sec securities of INR40b currently.
- Daily average LCR at 156%.
- The bank will continue to invest in the retail business.

Asset quality

- The total stressed exposure of INR18b includes four groups (a group based in the East, a diversified media group, a coffee group based in the South and a plastics group based in the West) plus a buffer (which is 10-15% of the pool).
- The bank has recognized INR8b of stressed exposures as NPA and made provisions of INR3.5b (much higher than regulatory requirement). Further, expect 3QFY20 trend to remain elevated while the remaining tail will be recognized in 4QFY20. The bank has taken a conservative stance to recognize all the stress in FY20 only.
- Thus, credit cost will continue to remain elevated over the next two quarters.
- Further, resolution has slowed down in the current challenging environment.
- Interest reversal during the quarter is INR200m.
- GNPA in the credit cards portfolio is 1.3% while credit cost is ~4-4.5%. Industry NPLs in cards is 1.8%.
- **Slippages break-up:** INR8b from stressed exposure; INR2.5-2.75b are technical slippages, INR0.7b from agri and the rest are routine slippages only.
- The LAP portfolio is fully mature now and having GNPAs in the range between 1.0-1.5%. This has resulted in an increase in retail GNPAs.
- The bank has moved the entire retail portfolio to daily stamping of NPAs.

Guidance

- The bank will look to raise capital in the current fiscal; its operating performance story remains intact; all stress will be absorbed during FY20E.
- Added 14 branches in urban and metro cities; will reach a total branch count of 380-400.
- 143 BC branches added during the quarter; bank has plans to add another 150
 BC branches in the coming quarter.

Valuation and view

RBK witnessed an unusual quarter with its asset quality deteriorating sharply led by higher slippages and increase in the total quantum of stressed pool. Bank's disclosed stressed pool stands at INR18b pertaining to the four groups (East based group, diversified media group, south based coffee group and west based plastics group plus a buffer) of which INR8b has been recognized as NPA while the remaining would be recognized in the coming quarters.

- The bank has made a provision of INR3.5b towards the above NPA accounts and further guided for the credit cost to remain elevated and we thus estimate credit cost of 2.6%/2.2% for FY20E/FY21E.
- The bank is not witnessing any signs of deterioration on the operating environment/delinquency trends in the retail segment and expects strong benefits to accrue from its partnership with Bajaj Finance in co-branded credit cards. The bank has already issued around ~2.3m cards since launch and aims to be amongst the top five credit card payers in the next three years and strives to achieve 4m+ cards by FY21. We expect the bank to leverage on BAF's vast customer base (~26m; 60% don't have credit cards), strong distribution scale, excellent risk and analytics infrastructure. This would enable fast-paced credit card customer acquisition at lower operating costs and lower credit costs (as these are tested customers of BAF) and also aid in higher fee income.
- RBK's exposure to the stressed exposures has increased further while coverage ratio has declined sharply. Management has guided for elevated slippages from the stressed pool over coming quarters before earnings begin to normalize however sluggish economic environment and RBK's chunky exposure to BBB/BB & below pool remains a concern. Strong growth in retail business led by cards/MFI and robust margins though does provide some cushion to its operating performance. Higher slippages and in turn higher credit cost drives sharp cut in our FY20/21 estimates. We thus estimate FY20 PAT to decline 20% YoY before earnings begin to normalize in FY21. Capital raise in 2H is critical for supporting growth and shoring up Tier-1 ratio. We revise our TP to INR350 (1.6x FY21E BV). Maintain Buy.
